SUMMER BULLETIN SPECIAL EDITION 'SPARKS'

ON THE HILL WITH VE3OSH Tuesday eve. 7.00 p.m. JULY 13 1976

Weather permitting there will be a gathering up at the repeater site to discuss whatever you wish to discuss - this is not a regular meeting. If it is clear and you have a telescope, bring it along. Binoculars are also acceptable

You may wish to see the recently installed solid-state receivers and hybrid transmitters - 2 of each and ask some questions about VE3OSH. Our Chief Engineer, VE3QG is still out in B.C. and our Logic engineer, VE3FIV is in Denmark but someone will have the answers. If you are not familiar with the location, herewith a general direction:

Proceed north on Simcoe St., Oshawa, pass Columbus and Raglan (the highway by-passes the latter), go up the hill after going under the CPR subway and make a right turn at the very crown of the hill. Go about 2 miles and turn at Wilson Road sign and there it is.

AMATEUR AND ADVANCED RESULTS

The successful candidates for the ADVANCED LICENCE were:

VE3HNNH Bob Miller
AMQ Gord MacDuff
ANX Vic Baker
EWB Bev Henderson
CAK Fred Henderson

The successful candidates for the AMATEUR LICENCE were:

VE3IHE Chris Pigott
Joe White
Norm Sadler
Vic Naderer
John Wright
George Burns
Rick Smiles

Congratulations to the above for their efforts
