

Aug 14/89

This is a special summer edition intended to announce the up coming Corn Roast and to report on happenings at the "Sermon on the Mount". To keep it short so that ye olde editor can resume his busy summer, I have miniaturized the usual preamble, executive listings, etc. It is contained in the tiny micro dot located in the upper right corner of this page. If it is important to you and you do not have the proper Mirco Dot reading equipment, this info can be found in the June issue or perhaps you can wait for the September issue.

3FRM

"Sermon on the Mount" If you didn't attend, you missed another swell time. Roughly 30 happy people came and helped devour all the delicious hot dogs and thirst quenching pop. The club owes a big vote of thanks to Velora and Rick Gibson, VE3ASH for their hard work in preparing and serving the goodies which added in no small way to the merriment of the meeting. There was lots of rag chewing all the way around. Ron, 3ORP has acquired an old Hammond transmitter complete with a 1401b power supply. This baby can run 100% duty cycle at full power. What a signal will be coming out of Lindsay soon! Ray, 3OUB built and tested an antenna in accordance with the article from the Firebird which we ran a few months ago. It works FBI Ron, 3AIV is working on his homebrew SSB rig and has transistorized the VFO and is filtering for parasitics. I think those are the things you find floating in your beer when left unattended in the back porch for a few minutes.

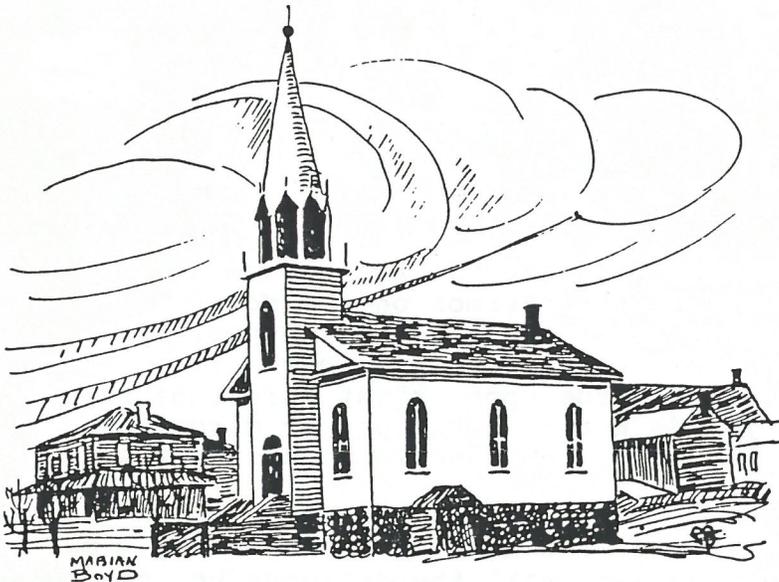

"SERMON con't"....Aldo Galati VE3IMR and his son came up to feel the cool exillering air and breath in the fellowship, comradery and good humor that was precipitating there. Aldo has signed aboard the good ship NSARC for one year. Welcome to Aldo and I hope he can make it to the Corn Roast too. Russell, 3ATT gave a demo of his super van complete with automatic door openers, elevator, swivel seats and every mode of communication a ham could hope for. He's even gonna get a telephone installed. Its more impressive than the one used in the TV series Ironsides!

Mike, 3DJY had some very nice snapshots, that he had taken through his telescope, of "Old Sol" with a fine out break of measles. He has a new lens filter and should be sporting some even better pictures of solar flares soon! Eric, 3HMG brought along a 40 lb. meteorite he discovered while digging for fishworms in his back yard. He also strung up an antenna and let the boys hear some VLF stuff on his Hewlett Packard.

It sure was nice n' cool up there on the mount, a real treat! T'was good to see Earl, VE3AZT again. Walter, 3DYE and many of the other OT's were missed. I kinda miss seein' Eddie AZV come roarin' in low gear up that hill in his canary yellow La Salle. Everyone present had a great time!!!

.....
VE3CNE FREE ADMISSION!!! The station and booth at the CNE needs OPs!!
Call Ralph, 3CRK at 723-5758; or Thelma at 757-5593; or Ron at 493-8662.

EXPERIMENTERS CORNER: Don't forget, most Sunday evenings around 9:00 p.m. on 3OSH. Round table discussions on everything from the electro magnetic potential generated within the glow worm to the best way to tie a casting fly to catch the Great Lower Scugog Muskelonge. Call for 3HMG or 3DJY.

St. John's Presbyterian Church, Port Perry, 1870

LETTER OF APPRECIATION!!!

To: Glen Goslin and members of the Radio Club.

On behalf of Canoe the Nonquon Committee, we once again, would like to express our thanks to the club, for its participation in the canoe race this year.

Your system and its members ran so smoothly that one has tendency to forget the work that goes into it, but those efforts are the main reason the canoe race works. The race couldn't be done be done without you- so for for all the years and this year - a big THANKYOU, especially Glen!

Joan Scott & Marilyn Pearce

.....
VE3NAA,UHF REPEATER: I keep forgetting to list this new repeater for the ultra highs. Input 448mcs, Output 443mcs. Thanks to Harry Westwood, VE3QG, we now have more communication capability.

.....
VE3MDV, Stan: is now out of the hospital and is recovering at home.

SWL: Ron McAllister is very ill and in the hospital. Ron had signed on for code & theory classes some time back but due to illness had to stop.

NEXT MEETING: SAME PLACE - SEPT 11TH!

4" INSERT SPIKED HERE

NAIL TO WALL FOR A REMINDER

GRATIS!!
FREE!
